PEGASUS SUCCESS STORIES

"I wanted to reach out to you all and acknowledge the quick response your team provided during the storm clean up at the Prevedel site this past week and a half. Your team's efforts displayed a partnership that we are striving to achieve especially in the infancy of the new Facility Engineer contract. They made sure that by the first business day preceding the event that both access was a safe and aesthetically pleasing image of the federal government's properties."

—Larry O'Neill, Director, St. Louis West Field Office, General Administration, Public Building Service

PERFORMANCE, SOLUTIONS, SATISFACTION.
